

RESPONSIBLE MOBILITIES
Making Tourism a Positive Experience

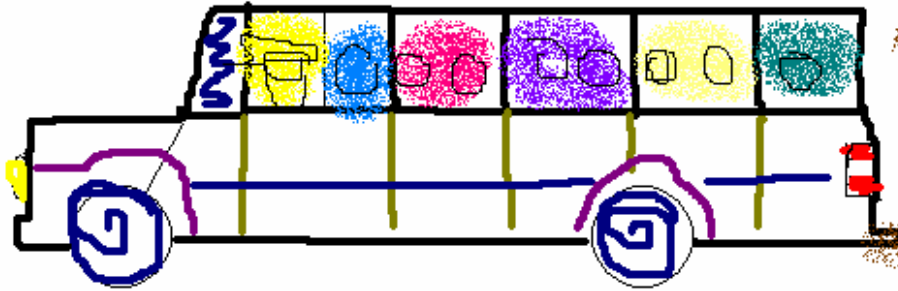

CLEAN MOBILITY

SUMMER 2008

"Clean Mobility" is about discovering the villages of Lebanon with a challenge in mind:

*Positive impact of tourism,
facing climate change.*

The voluntary light and slow mobility you decide to experience in a sustainable way, using public and local transportation means, insures that the same opportunity will be there for future generations.

Responsible Mobilities, the leader in Responsible Tourism in Lebanon, offers you the opportunity this summer 2008, to visit 10 villages spread all over the nation, and get connected with local populations through a sustainable travel experience to natural and cultural heritage, generating a positive economic benefit.
